

PRESS RELEASE

Augsburg, 13.01.2021

Four new hybrid sealants and adhesives cover almost all applications in the areas of fastening, joining and sealing

New PCI range 'Sealing & Bonding' for simple, tidy assembly without drilling or screws

■ **Augsburg, 13 January, 2021 - PCI Augsburg GmbH is presenting a completely new product range at BAU Online 2021. Whether expansion, renovation and refurbishment, assembly or repair work: With the one-component hybrid sealants and adhesives based on SMP (Silane Modified Polymers), bonding and sealing almost all materials is quick and easy - inside and outside. All “Sealing & Bonding” products from PCI offer high adhesive strength, can be painted over and are free from isocyanate and silicone.**

Each of the four new PCI sealants and adhesives has its own advantages, together they cover all areas of application, e.g. sealing and bonding in wood and metal construction, in furniture construction, cover and base strips, mirrors, window sills or building boards, connection joints on windows / doors, floor / wall or on the roof.

PCI Uniform® is a multi-use hybrid adhesive for bonding and sealing almost all materials and substrates in building construction and civil engineering. Possible applications include, for example, aluminum, fiber cement, fully-vitrified tiles, glass, wood, ceramic, plastic, metal, PVC or mirrors. PCI Uniform® scores particularly well with its high adhesive strength, very good non-sag properties and convenient processing.

USt-IdNr.: DE811143409

With a wide range of adhesives and its resistance to water and chemicals, **PCI Elastoferm**[®] is suitable for bonding and sealing connection joints. The silicone-free adhesive is specially designed for elastic joints on absorbent and non-absorbent substrates, the elasticity of the joints is retained even after processing. The product is available in three different colors (white, cement grey, concrete grey).

▪ **PCI Rapidferm**[®] has been developed for the quick bonding of different materials - fast setting, with strong initial adhesion and high final strength. The areas of application of the hybrid adhesive include, for example, concrete, wood, ceramics, clinker, plastic or metal. The particular strength of PCI Rapidferm[®] is the bonding of heavy loads.

▪ The transparent hybrid adhesive **PCI Glasferm**[®] has been designed for bonding and sealing transparent materials. The product remains permanently elastic even after it has hardened and is insensitive to mold, making it ideal for use in the bathroom and other damp areas. Thanks to its crystal-clear color, PCI Glasferm[®] is the perfect solution for visible applications.

The four new hybrid adhesives are also the subject of the new annual campaign 'Sealing & Bonding' which PCI will start in spring 2021. The new product flyer 'Sealing & Bonding' includes all information on the individual products in a compact format as well as an overview of which materials / substrates can be glued to which product from the 'Sealing & Bonding' range.

“With the PCI range“ Sealing & Bonding ”we offer a new complete portfolio of sealants and adhesives based on SMP that leaves nothing to be desired. Easy to process, quick-drying and with high adhesive strength - bonding and sealing almost all materials is now quick and easy. Cumbersome drilling and screw

tightening is no longer necessary," says Thorsten Leppler, PCI Product Manager Tile and Natural Stone Technology.

About PCI

PCI Augsburg GmbH is part of MBCC Group and leader in the tile laying materials sector for specialist firms in Germany, Austria and Switzerland. In addition, the company supplies product systems for waterproofing, concrete protection and repair, as well as a complete product range for the flooring sector. The PCI Group employs a staff of more than 1,200 in Europe and generated sales of significantly over €300 million net in 2019. Further information about PCI on the Internet under www.pci-augsburg.de.

About MBCC Group

The MBCC Group is one of the leading suppliers of construction chemicals and solutions worldwide and has emerged from the carve-out of the former BASF Construction Chemicals business from BASF Group. We offer innovative and sustainable products and solutions for the construction industry across different sectors, such as buildings, structures, underground construction, new construction, as well as for renovation. Our strong brands Master Builders Solutions®, PCI®, Thermotek®, Wolman®, Colorbiotics® and Watson Bowman Acme® are well established in the marketplace. With our innovations, we address sustainability challenges in the industry. MBCC Group consists of approximately 70 legal entities worldwide and is home to around 7,500 construction experts in over 60 countries. For more information go to: www.mbcc-group.com.

We build sustainable performance.
