

PRESS RELEASE

Augsburg, 03.04.2023

Maximum crack bridging properties guaranteed with inserted fabric

PCI Barraseal Ready: labeling-free waterproofing – ready to use, fast and easy to apply

Augsburg, April 3, 2023 – With PCI Barraseal Ready, PCI presents a new, ready-to-use waterproofing product which, in combination with the PCI Barraseal Ready Vlies fabric, is the ideal waterproofing solution for the installation of floor-to-ceiling window and door elements. Craftsmen benefit from the easy and fast application of the 1-component waterproofing material which is ready-to-use and does not require labeling.

In combination with the inserted fabric PCI Barraseal Ready Vlies, the new waterproofing product guarantees maximum crack bridging properties and thus a reliable and impermeable integration of details in the waterproofing of a building. [PCI Barraseal Ready](#) adheres to all common substrates in the fields of application: to existing waterproofing materials as well as to the usual materials of extension elements for windows and doors.

The new 1-component waterproofing product PCI Barraseal Ready is ready to use and can be applied directly from the container - craftsmen do not have to mix it beforehand or dispose of excess material afterwards. The opened container can be closed again after the work is finished and stored until the next use.

Sitz der Gesellschaft:
PCI Augsburg GmbH
Piccardstraße 11, 86159 Augsburg
Postfach 10 22 47, 86012 Augsburg
Tel. +49 (8 21) 59 01-0
Fax +49 (8 21) 59 01-372

Geschäftsführer:
Stefan Harder
Frank Rösiger

Aufsichtsratsvorsitzender:
Carsten Hennicke

Registergericht:
Amtsgericht Augsburg, HRB 6355
USt-IdNr.: DE811143409

The waterproofing material dries quickly and is UV, aging and weather resistant. The application is quick and easy: After applying the first layer, the fabric PCI Barraseal Ready Vlies is inserted. The craftsman can then apply the second layer directly wet on wet – this saves time.

- Ready to use and easy to apply
- Fast curing – rainproof after approx. 1 hour and able to bear weight after approx. 12 hours
- No labeling required

PCI Barraseal Ready is based on a silane modified polymer. The material has a liquid-pasty consistency, grey color and can be applied by roller or brush. It complies with the waterproofing standard DIN 18533.

"With PCI Barraseal Ready in the system with the PCI Barraseal Ready Vlies fabric, floor-to-ceiling window and door elements can be integrated in the waterproofing of a building without great effort and loss of material. Craftsmen will appreciate the extremely easy and quick application," explains Stephan Tschernek, Head of Marketing PCI Group. "The combination with the inserted fabric offers additional reliability and ensures a high level of crack bridging."
