

PRESS RELEASE

Augsburg, Oct 4, 2021

Easy and quick installation, one hundred percent waterproof

PCI PowerBoard Waterline – for individual, level-entry shower solutions

Augsburg, October 4, 2021 – The completely new product line PCI PowerBoard Waterline offers diverse and absolutely waterproof shower solutions for every type of construction project in residential and commercial buildings. The new range consists of three different systems, each with different formats and designs for a multitude of individual requirements. Craftsmen benefit from the uncomplicated, reliable installation, users from the particularly simple and thorough shower cleaning.

Stepless, open and floor-level showers are on the rise. They offer sufficient space, are barrier-free, convenient to use and easy to clean. This requires high-quality solutions that are equally practical, functional and also aesthetically pleasing - not an easy task for tilers and plumbing companies.

To meet this challenge, PCI has developed the new PCI PowerBoard Waterline range with three different shower solutions for a wide variety of requirements. All three solutions enable reliable and simple installation thanks to the tool-free clip-in waterproofing collar, drainage nozzle that can be positioned on three sides and a removable frame for subsequent fine adjustment. They are absolutely waterproof in accordance with the waterproofing standard DIN 18534-6 and have the official test certificates.

Thanks to the completely removable odor trap, the user has direct access to the drain area and can thus clean the shower easily and thoroughly.

Sitz der Gesellschaft:
PCI Augsburg GmbH
Piccardstraße 11, 86159 Augsburg
Postfach 10 22 47, 86012 Augsburg

Frank Rösiger

Aufsichtsratsvorsitzender:
Carsten Hennicke

Registergericht:
Amtsgericht Augsburg, HRB 6355
USt-IdNr.: DE811143409

The new range is now available in three versions:

- **PCI PowerBoard Linea:** prefabricated shower elements with linear drain, integrated drainage technology and various channel covers
- **PCI PowerBoard Point:** prefabricated shower elements with centered or non-centered point drain
- **PCI PowerBoard Individual:** variable drain configurations with high-quality designer channels, individual positioning, maximum design options

■ The new PCI PowerBoard Waterline product line complements the existing PCI PowerBoard range to produce barrier-free shower systems. The prefabricated shower elements of the two systems PCI PowerBoard Linea and PCI PowerBoard Point have an integrated gradient and can therefore be used directly without any drying time. The newly developed, dimensionally stable XPS core is coated with special mortar and glass fiber fabric on both sides thus ensuring even better stability and absolute water tightness. The new PCI shower elements can be covered with all tile formats without an additional fairing coat.

■ “The new PowerBoard Waterline product line offers many advantages for craftsmen. Thanks to the harmonized PCI system solutions, tile laying companies can install and connect the shower solutions completely with products from a single source, reliably and easily. That plus the convenient processing properties allow rapid construction progress”, says Stephan Tschernek, Head of Marketing PCI Group. "Additional business opportunities are opening up for the sanitary and building materials trade, and they can also advise customers even more individually on the wide range of applications of PCI PowerBoard Waterline."

As a system provider, PCI also has matching products in its portfolio for the installation of the level-entry shower solution to match the new PCI

PowerBoard Waterline range. The new brochure “Modern Bathrooms - PCI PowerBoard Waterline” includes detailed information on the various system solutions and can be downloaded from the following [LINK](#). In the [video](#) of the "PCI presents" series, PCI product manager Thorsten Leppler introduces the new PCI PowerBoard Waterline range.
